

PROJECT DOCUMENTATION

Reference-Based System Documentation

Head: Sreemathi M

Members: Sandhiya A, Sowmiya S

This document has been prepared using the supplied project screen recording as the reference. The screenshots are arranged in sequence and supported with brief descriptions so that the material can be used as a formal project record.

Prepared from the provided reference material

1. Project Overview

The project demonstrates the configuration and management of a system through a structured interface. The reference recording shows navigation, object configuration and record-type related activities. This documentation converts those visual steps into a readable project report.

2. Team Details

Head: Sreemathi M

Members: Sandhiya A, Sowmiya S

3. Key Area Covered

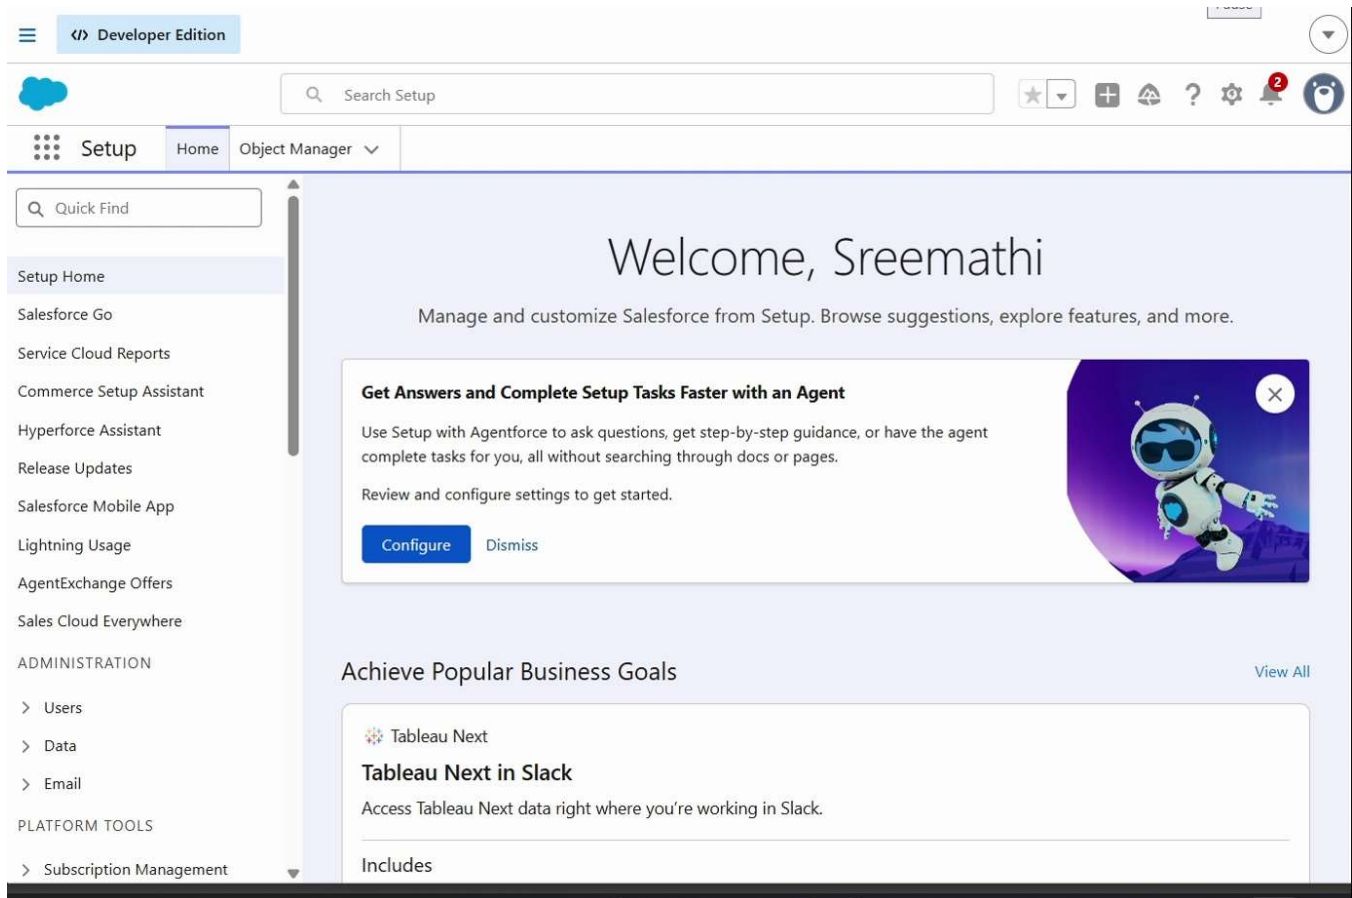

The reference material includes the Customer Account object and its Record Types section. The visible record types include Online Order and Walk-In Order. These configurations are documented below using screenshots captured from the recording.

4. Process Flow

- Open the required system/object area.
- Navigate to the relevant configuration section.
- Review or configure the required record types.
- Verify the displayed configuration.
- Capture the completed state for documentation.

5. Reference Screenshot 1

This screenshot is included from the supplied screen recording to document the corresponding stage of the project workflow.

Reference point: approximately 10 seconds into the recording.

6. Reference Screenshot 2

This screenshot is included from the supplied screen recording to document the corresponding stage of the project workflow.

16. Conclusion

The supplied screen recording has been converted into a structured project document. The sequence of screenshots preserves the visual reference, while the accompanying descriptions explain the purpose of the documented steps. The team details are recorded as Head: Sreemathi M and Members: Sandhiya A and Sowmiya S.

17. Documentation Note

The screenshots in this report are reproduced from the reference material supplied for this task. The descriptions are intended to make the visual workflow easier to understand and present as a formal document.
